Triomya

Coding Intelligence to Work

Mission : The Journey of Triomya Starts with Intelligence, roots in freedom and ends at automated life support for humans

Etymology of Triomya

"The word **Triomya** simply means an organization capable of delivering innovation, modification and simplification of systems through software coded intelligence allied with automation and Life-systems."
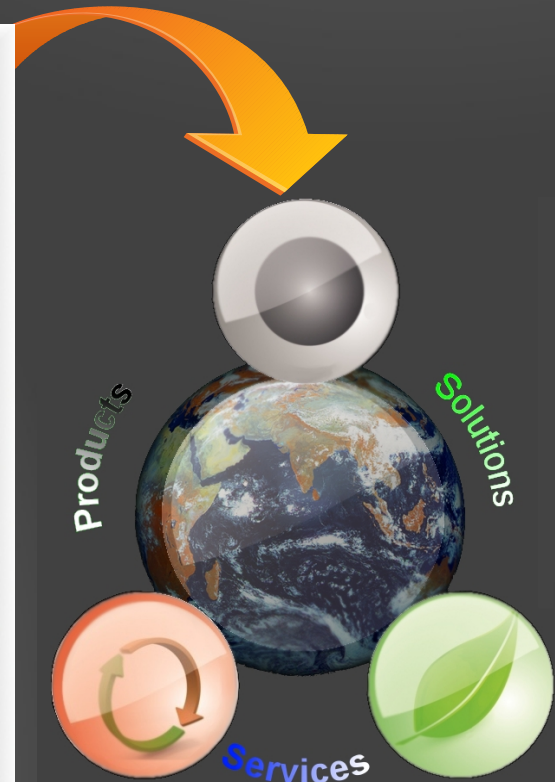

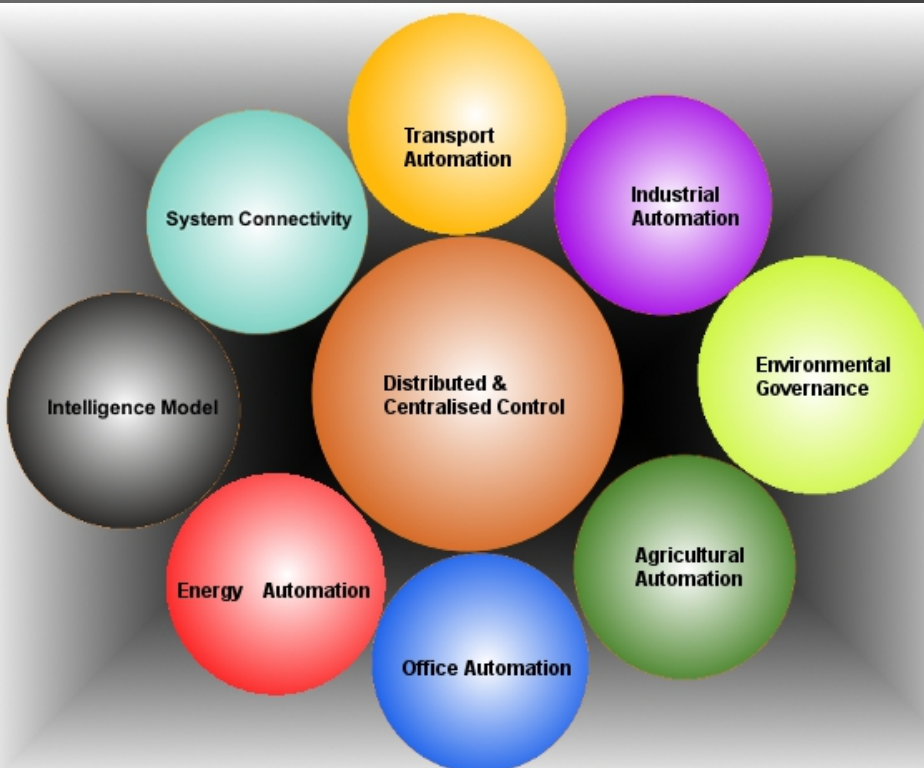

Triomya Divisions

Intelligence   **Automation**   **Life-Systems**

Triomya Business Model and its Potential

At Triomya we follow a flexible business model which outsources expertise of various global players along with our intelligence model in-order to accomplish the mission statement of Triomya. This situation creates an immense amount of business potential of global size.

intelligence

Intelligence Division is the creative division of Triomya. The design and development activities of intelligent applications for software packages, automation systems and life systems are carried out through this division.

Standards: Triomya implements appropriate standards for all its intelligent designs. These standards are developed and tested from the house of Triomya.
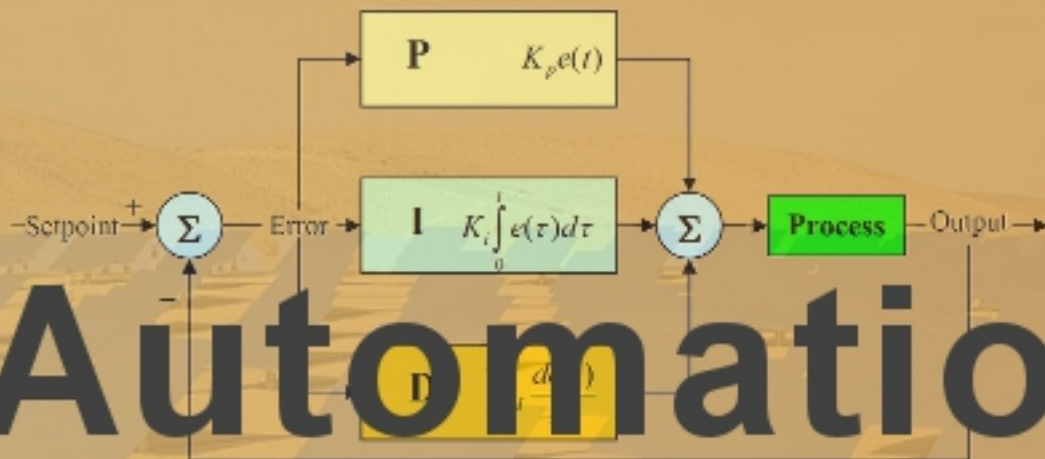

▶ AIS (Animation Intelligence Standard)

▶ MIS (Machine Intelligence Standard)

Intelligent Design and Development Areas :

- ○ **Information Processing**
- ○ **Machines Development**
- ○ **Utilities**
- ○ **Cloud Computing**
- ○ **Simulations**
- ○ **Pattern Recognition**
- ○ **Instrumentation Systems Development**
- ○ **Educational Systems**

Automation

Automation is the technical division of Triomya. It provides end-to-end products, solutions and services for offices, industries, systems, workspaces and other portable sytems for human experience.
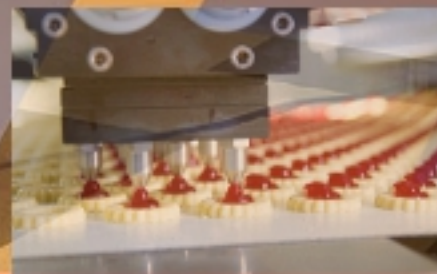

Activity Cycle:

- System Study
- Modeling
- Identifying Machinable Activities
- Design
- Development
- Integration and Testing
- Implementation
- Intelligence Factoring
- Freedom Factoring
- Operations and Maintenance

Scope:

- Home Automation
- Office Automation
- Industrial Automation
- Energy Automation
- Transport Automation
- Communication Automation
- Agricultural Automation
- Food Automation
- Digital Environment Automation
- Robotic Work Force Automation
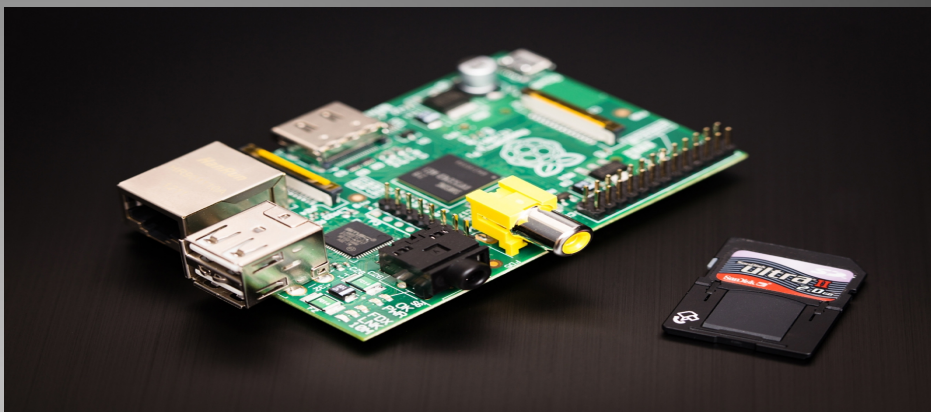

Life-Systems

Life Systems is the special division of Triomya which enhances human life through the products, solutions and services of Intelligence and automation divisions.

Environmental Governance

Triomya commits for a naturally driven healthy living space environment around its limits. Through policies and sensing technologies Triomya will constantly improve and establish Natural rhythm co-exist with its products, solutions and services. In due course of time Triomya will monitor and report the ecological cycle on Earth through its systems.

Scope:

- Bionic Systems
- Personal Accessories
- Educational Systems
- Digital Art Systems
- Entertainment and Media Systems
- Freedom Machines
- E-Computing
